bhanu-thedataanalyst.pages.dev

PROFESSIONAL SUMMARY

Aspiring Data Scientist learning Machine Learning, NLP, and predictive modeling. Building projects with Python and Scikit-learn to grow my ML skills.

EDUCATION

Indian Institute of Technology, Madras

2025 – 2028

B.Sc. in Data Science

Rigorous training in statistics, machine learning, and advanced analytics.

Kendriya Vidyalaya No. 2, Jaipur

Graduated

High School Education

Strong foundation in STEM academics.

TECHNICAL SKILLS

Languages: Python, SQL

ML/DL: Scikit-learn, XGBoost, Logistic Regression, SVM, TF-IDF

Data: Pandas, NumPy, NLTK, Feature Engineering, StandardScaler

Tools: Jupyter, Google Colab, Git, Streamlit

MACHINE LEARNING PROJECTS

Rock vs Mine Prediction

github.com/bhanu2006-24/ML-projects

Tech: *Logistic Regression, SONAR Data*

- Binary classifier predicting underwater objects from SONAR signals (76% accuracy).

Diabetes Prediction

github.com/bhanu2006-24/ML-projects

Tech: *SVM, Medical Data, StandardScaler*

- Healthcare ML model predicting diabetes from PIMA dataset (77% accuracy).

House Price Prediction

github.com/bhanu2006-24/ML-projects

Tech: *XGBoost, California Housing*

- Regression model predicting home prices with 82.87% R^2 score.

Fake News Detection

github.com/bhanu2006-24/ML-projects

Tech: *NLP, TF-IDF, Text Classification*

- Classifies news articles as real/fake using NLP (97.9% accuracy).

Trader Sentiment Analysis

github.com/bhanu2006-24/trader-sentiment-analysis

Tech: *Python, ML, NLP, Time Series*

- Analyzing Bitcoin Fear & Greed Index correlation with trader performance.
