PROFESSIONAL SUMMARY

Aspiring Data Analyst building interactive dashboards with Python, SQL, and Tableau to uncover insights from complex data. Passionate about storytelling through data visualization and end-to-end analytics pipelines.

EDUCATION

Indian Institute of Technology, Madras

2025 – 2028

B.Sc. in Data Science

Rigorous training in statistics, machine learning, and analytics.

Kendriya Vidyalaya No. 2, Jaipur

Graduated

High School Education

Strong foundation in STEM academics.

TECHNICAL SKILLS

Languages: Python, SQL, PostgreSQL, JavaScript, HTML/CSS

Analysis: Pandas, NumPy, BeautifulSoup, Excel

Visualization: Tableau, Seaborn, Streamlit, Plotly

Web/Tools: Flask, TailwindCSS, React

PROJECTS

Trader Sentiment Analysis

github.com/bhanu2006-24/trader-sentiment-analysis

Tech Stack: Python, Pandas, Streamlit, Data Visualization

- Data science project analyzing Bitcoin Fear & Greed Index correlation with trader performance on Hyperliquid. Features data merging, win/loss rate analysis, and interactive Streamlit dashboard.

Crypto Analysis Suite

github.com/bhanu2006-24/crypto-analysis

Tech Stack: Streamlit, Python, CoinGecko API

- Dynamic dashboard fetching live cryptocurrency data. Features automated data cleaning, KPI cards, and interactive visualization of market trends.

IMDb Analytics Dashboard

github.com/bhanu2006-24/imdb-analysis

Tech Stack: Plotly, Pandas, Python

- Interactive analytics tool analyzing movies, cast, and genres. Includes correlation heatmaps, yearly trend analysis, and genre frequency distributions.

Steam Games Analytics

github.com/bhanu2006-24/steam-analysis

Tech Stack: Web Scraping, EDA, Streamlit

- End-to-end pipeline scraping Steam store data to explore pricing and review trends. Features robust scraping workflow and export capabilities.
